The LOS ANGELES COUNTY HOMELESS CRISIS

Homelessness is a nationwide problem that is increasingly visible in many American cities. The prevailing problem of homelessness is most severe on the West Coast.

As many of you are already aware, the Homeless Crisis in Los Angeles has reached epidemic proportions. The Los Angeles Homeless Service Authority estimates that approximately 50,000 to 60,000 people may be found homeless on any given night in Los Angeles County and more than 44,000 live on the streets.

AHF is committed to finding solutions to resolve housing issues to aid in improving the overall health and wellbeing of our members.

WHAT YOU CAN DO? AHF is initiating a “registry” process of our homeless/couch surfing members to be proactive in risk identification and planning.

We need all in network providers to assist with identifying and documenting the appropriate ICD-10 code for homeless and social determinant risk on all appropriate claims submissions to AHF. AHF will subsequently use this coding process to monitor, intervene and if possible improve upon members housing situations.

The appropriate ICD 10 codes to *diagnose persons with potential health hazards related to socioeconomic and psychosocial circumstances* are listed as follows:
