What is the PHC California formulary?

A formulary is a list of covered drugs chosen by PHC California. We do this with a team of health care providers. Our formulary is approved by the California Department of Health Care Services. The formulary represents the prescription therapies believed to be a necessary part of a quality treatment program.

PHC California will generally cover the drugs listed in our formulary as long as:

- The drug is medically necessary
- Your prescription is filled at a PHC California network pharmacy
- You follow other plan rules.

For more information on how to fill your prescriptions, please see your PHC California Member Handbook.

Can the formulary change?

Generally, if you are taking a drug on our formulary that was covered, we will not stop or reduce coverage of the drug except:

- When a new, less expensive generic drug becomes available, or
- When new adverse information about the safety or effectiveness of a drug is released.

Other types of formulary changes, such as removing a drug from our formulary, will not affect members who are currently taking the drug. It will remain available as long as it is medically necessary and no alternative drug is available.

If we remove drugs from our formulary, add prior authorization, quantity limits, or step therapy restrictions to a drug, we will tell affected members of the change. We will do this at least 30 days before the change becomes effective. Members who are affected by the change may fill their prescriptions of the drug that was changed up to 90 days after the change effective date.

If the Food and Drug Administration deems a drug on our formulary to be unsafe or the drug's manufacturer removes the drug from the market, we will immediately remove the drug from our formulary. We will also tell members who take the drug.

To get updated information about the drugs covered by PHC California, please visit our website at www.phc-ca.org/members/formulary, or call Pharmacy Customer Service at (888) 436-5018, 24 hours a day, seven days a week. TTY users call 711.

How do I use the formulary?

There are two ways to find your drug within the formulary:

Category

The formulary begins on page 1. The drugs in this formulary are grouped into categories by type. If you know the drug type, look for the category name in the list that begins on page 1. Then look under the category name for your drug.

Alphabetical Listing

If you are not sure what category to look under, you should look for your drug in the index. It starts on page I-1. The index provides an alphabetical list of all of the drugs included in this document. Generic drugs are listed in the index. Look in the index and find your drug. Next to your drug, you will see the page number where you can find coverage information. Turn to the page listed in the index and find the name of your drug in the first column of the list.

What are generic drugs?

PHC California covers both brand name drugs and generic drugs. A generic drug is approved by the FDA as having the same active ingredient as the brand name drug. Generally, generic drugs cost less than brand name drugs.

Are there any restrictions on my coverage?

Some covered drugs may have additional requirements or limits on coverage. These requirements and limits may include:

- **Age:** Some drugs on our formulary are not appropriate for and may pose a risk to people of certain ages.
- **Prior Authorization:** PHC California requires your physician to get prior authorization for certain drugs. This means that you will need to get approval from PHC California before you fill your prescriptions. If you don't get approval, the plan may not cover the drug.
- **Quantity Limits:** For certain drugs, PHC California limits the amount of the drug that it will cover. For example, PHC California provides one patch per three days for a prescription of fentanyl transdermal patch.
- **Step Therapy:** For certain drugs, PHC California will only cover these drugs after you first try another drug to treat your condition. A drug with a "step therapy" restriction may only be covered if the other drug does not work for you.

You can ask PHC California to make an exception to these restrictions or limits. See the section, “How do I request an exception to the PHC California’s formulary?” on this page for information about how to request an exception.

What are over-the-counter drugs?

Over-the-counter (OTC) drugs are non-prescription drugs that are not normally covered by a Medi-Cal managed care plan. PHC California does not cover most OTC drugs.

What if my drug is not on the formulary?

If your drug is not included in this list of covered drugs, you should first contact Pharmacy Customer Service and ask if your drug is covered. You can contact Pharmacy Customer Service at (888) 436-5018, 24 hours a day, seven days a week. TTY users call 711.

If you learn that PHC California does not cover your drug, you have two options:

- You can ask Pharmacy Customer Service for a list of similar drugs that are covered by PHC California. When you get the list, show it to your doctor and ask him or her to prescribe a similar drug that is covered by the plan.
- You can ask PHC California to make an exception and cover your drug. See below for information about how to request an exception.

How do I request an exception to the formulary?

You can ask PHC California to make an exception to our coverage rules. There are several types of exceptions that you can ask us to make.

- You can ask us to cover your drug even if it is not on our formulary.
- You can ask us to waive coverage restrictions or limits on your drug. For example, for certain drugs, PHC California limits the amount of the drug that we will cover. If your drug has a quantity limit, you can ask us to waive the limit and cover more.

Generally, PHC California will only approve your request for an exception if the alternative drugs included on the plan’s formulary. Or, additional utilization restrictions would not be as effective in treating your condition and/or would cause you to have adverse medical effects.

You should contact us to ask us for an initial coverage decision for a formulary or utilization restriction exception. **When you ask for a formulary or utilization restriction exception you should give us a statement from your physician**

supporting your request. We must make our decision within 24 hours or one (1) business day of getting your prescribing physician's supporting statement.

What do I do before I talk to my doctor about changing my drugs or requesting an exception?

As a new or continuing member in our plan, you may be taking drugs that are not on our formulary. Or, you may be taking a drug that is on our formulary but your ability to get it is limited. For example, you may need to ask us for approval before you can fill your prescription. You should talk to your doctor to decide if you should switch to an appropriate drug that we cover. Or, ask for a formulary exception so that we will cover the drug you take. While you talk to your doctor to decide the right course of action for you, we may cover your drug in certain cases.

For each of your drugs that is not on our formulary or if your ability to get your drugs is limited, we will cover a temporary 30-day supply (unless you have a prescription written for fewer days) when you go to a network pharmacy. After your first 30-day supply, we will not pay for these drugs.

PHC California Formulary

The formulary that begins on page 1 lists the drugs covered by PHC California. If you have trouble finding your drug in the list, turn to the index that begins on page I-1. If your drug is not in this formulary, please call Pharmacy Customer Service at (888) 436-5018, 24 hours a day, seven days a week. TTY users call 711.

The first column of the chart lists the drug name. If a brand is available of the drug, the brand name is shown in capital letters. For example, DESCOVY ORAL TABLET 200-25 MG. Generic drugs are listed in lower case in italics. For example, *abacavir-lamivudine oral tablet 600-300 mg*. The information in the "Notes" column tells you if PHC California has any special requirements for coverage of the drug. Below is an explanation of the abbreviations used in the formulary in the "Notes" column.

Utilization Management Restrictions

Abbreviation	Description	Explanation
AGE	Age Restriction	Some drugs on our formulary are not appropriate for and may pose a risk to people of certain ages. If a drug has an age restriction, the minimum or maximum age of appropriateness is noted.
CARVE OUT MEDICATION	Medication Is Covered by Medi-Cal	Some drugs are covered by Regular Medi-Cal (fee-for-service) or the Drug Medi-Cal Program.
PA	Prior Authorization Restriction	You (or your physician) are required to get prior authorization from PHC California before you fill your prescription for this drug. Without prior approval, PHC California may not cover this drug.
QL	Quantity Limit Restriction	PHC California limits the amount of this drug that is covered per prescription, or within a specific time frame.
ST	Step Therapy Restriction	Before PHC California will provide coverage for this drug, you must first try another drug(s) to treat your medical condition. This drug may only be covered if the other drug(s) does not work for you.
