Note to existing members: This Formulary has changed since last year. Please review this document to make sure that it still contains the drugs you take.

When this Drug List (Formulary) refers to “we,” “us,” or “our,” it means AIDS Healthcare Foundation. When it refers to “plan” or “our plan,” it means PHP.

This document includes a Drug List (formulary) for our plan which is current as of October 28, 2024. For an updated Drug List (formulary), please contact us. Our contact information, along with the date we last updated the Drug List (formulary), appears on the front and back cover pages.

You must generally use network pharmacies to use your prescription drug benefit. Benefits, formulary, pharmacy network, and/or copayments/coinsurance may change on January 1, 2026, and from time to time during the year.

This information is available for free in other languages. Please call our Member Services number at (800) 263-0067, 8:00 a.m. to 8:00 p.m., seven days a week.

What is the PHP formulary?

In this document, we use the terms Drug List and formulary to mean the same thing. A formulary is a list of covered drugs selected by PHP in consultation with a team of health care providers, which represents the prescription therapies believed to be a necessary part of a quality treatment program. PHP will generally cover the drugs listed in our formulary as long as the drug is medically necessary, the prescription is filled at a PHP network pharmacy, and other plan rules are followed. For more information on how to fill your prescriptions, please review your *Evidence of Coverage*.

For a complete listing of all prescription drugs covered by PHP, please visit our website or call us. Our contact information, along with the date we last updated the formulary, appears on the front and back cover pages.

Can the formulary change?

Most changes in drug coverage happen on January 1, but we may add or remove drugs on the formulary during the year, move them to different cost-sharing tiers, or add new restrictions. We must follow the Medicare rules in making these changes. Updates to the formulary are posted monthly to our website here: www.php-ca.org/members/drug-benefit/formulary.

Changes that can affect you this year: In the below cases, you will be affected by coverage changes during the year:

- **Immediate substitutions of certain new versions of brand name drugs and original biological products.** We may immediately remove a drug from our formulary if we are replacing it with a certain new version of that drug that will appear on the same or lower cost-sharing tier and with the same or fewer restrictions. When we add a new version of a drug to our formulary, we may decide to keep the brand name drug or original biological product on our formulary, but immediately move it to a different cost-sharing tier or add new restrictions.

We can make these immediate changes only if we are adding a new generic version of a brand name drug, or adding certain new biosimilar versions of an original biological product, that was already on the formulary (for example, adding an interchangeable biosimilar that can be substituted for an original biological product by a pharmacy without a new prescription).

If you are currently taking the brand name drug or original biological product, we may not tell you in advance before we make an immediate change, but we will later provide you with information about the specific change(s) we have made.

If we make such a change, you or your prescriber can ask us to make an exception and continue to cover for you the drug that is being changed. For more information, see the section below titled "How do I request an exception to the PHP Formulary?"

Some of these drug types may be new to you. For more information, see the section below titled "What are original biological products and how are they related to biosimilars?"

- **Drugs removed from the market.** If a drug is withdrawn from sale by the manufacturer or the Food and Drug Administration (FDA) determines to be withdrawn for safety or effectiveness reasons, we may immediately remove the drug from our formulary and later provide notice to members who take the drug.
- **Other changes.** We may make other changes that affect members currently taking a drug. For instance, we may remove a brand name drug from the formulary when adding a generic equivalent or remove an original biological product when adding a biosimilar. We may also apply new restrictions to the brand name drug or original biological product, or move it to a different cost-sharing tier, or both. We may make changes based on new clinical guidelines. If we remove drugs from our formulary, add prior authorization, quantity limits and/or step therapy restrictions on a drug, or move a drug to a higher cost-sharing tier, we must notify affected members of the change at least 30 days before the change becomes effective. Alternatively, when a member requests a refill of the drug, they may receive a 30-day supply of the drug and notice of the change.

If we make these other changes, you or your prescriber can ask us to make an exception for you and continue to cover the drug you have been taking. The notice we provide you will also include information on how to request an exception, and you can also find information in the section below entitled "How do I request an exception to the PHP Formulary?"

Changes that will not affect you if you are currently taking the drug. Generally, if you are taking a drug on our 2025 formulary that was covered at the beginning of the year, we will not discontinue or reduce coverage of the drug during the 2025 coverage

year except as described above. This means these drugs will remain available at the same cost-sharing and with no new restrictions for those members taking them for the remainder of the coverage year. You will not get direct notice this year about changes that do not affect you. However, on January 1 of the next year, such changes would affect you, and it is important to check the formulary for the new benefit year for any changes to drugs.

The enclosed formulary is current as of October 28, 2024. To get updated information about the drugs covered by PHP, please contact us. Our contact information appears on the front and back cover pages.

Should we make changes to the formulary during the year, we will notify you by sending a "Notice of Changes to Your Formulary (List of Covered Drugs)" in your Part D Explanation of Benefits (also called a "Part D EOB"). We mail you a Part D Explanation of Benefits when you have had one or more prescriptions filled through the plan during the previous month every month so you can track your Part D out-of-pocket costs and total drug costs for the year. For more information about the Part D Explanation of Benefits, please see your *Evidence of Coverage*, Chapter 6, Section 3.1.

How do I use the Formulary?

There are two ways to find your drug within the formulary:

Medical Condition

The formulary begins on page 3. The drugs in this formulary are grouped into categories depending on the type of medical conditions that they are used to treat. For example, drugs used to treat a heart condition are listed under the category, "Cardiovascular Agents." If you know what your drug is used for, look for the category name in the list that begins on page 1. Then look under the category name for your drug.

Alphabetical Listing

If you are not sure what category to look under, you should look for your drug in the index that begins on page I-1. The index provides an alphabetical list of all of the drugs included in this document. Both brand-name drugs and generic drugs are listed in the index. Look in the index and find your drug. Next to your drug, you will see the page number where you can find coverage information. Turn to the page listed in the index and find the name of your drug in the first column of the list.

What are generic drugs?

PHP covers both brand-name drugs and generic drugs. A generic drug is approved by the FDA as having the same active ingredient as the brand-name drug. Generally, generic drugs work just as well as and usually cost less than brand name drugs. There are generic drug substitutes available for many brand name drugs. Generic drugs usually can be substituted for the brand name drug at the pharmacy without needing a new prescription, depending on state laws.

What are original biological products and how are they related to biosimilars?

On the formulary, when we refer to drugs, this could mean a drug or a biological product. Biological products are drugs that are more complex than typical drugs. Since biological products are more complex than typical drugs, instead of having a generic form, they have alternatives that are called biosimilars. Generally, biosimilars work just as well as the original biological product and may cost less. There are biosimilar alternatives for some original biological products. Some biosimilars are interchangeable biosimilars and, depending on state laws, may be substituted for the original biological product at the pharmacy without needing a new prescription, just like generic drugs can be substituted for brand name drugs.

- For discussion of drug types, please see the *Evidence of Coverage*, Chapter 5, Section 3.1, "The Drug List tells which Part D drugs are covered."

Are there any restrictions on my coverage?

Some covered drugs may have additional requirements or limits on coverage. These requirements and limits may include:

- **Prior Authorization:** PHP requires you or your prescriber to get prior authorization for certain drugs. This means that you will need to get approval from PHP before you fill your prescriptions. If you don't get approval, PHP may not cover the drug.
- **Quantity Limits:** For certain drugs, PHP limits the amount of the drug that PHP will cover. For example, PHP provides 12 tablets per prescription for MAXALT (10 mg). This may be in addition to a standard one month or three month supply.
- **Step Therapy:** In some cases, PHP requires you to first try certain drugs to treat your medical condition before we will cover another drug for that condition. For

example, if Drug A and Drug B both treat your medical condition, PHP may not cover Drug B unless you try Drug A first. If Drug A does not work for you, PHP will then cover Drug B.

You can find out if your drug has any additional requirements or limits by looking in the formulary that begins on page 3. You can also get more information about the restrictions applied to specific covered drugs by visiting our website. We have posted online documents that explain our prior authorization and step therapy restrictions. You may also ask us to send you a copy. Our contact information, along with the date we last updated the formulary, appears on the front and back cover pages.

You can ask PHP to make an exception to these restrictions or limits or for a list of other, similar drugs that may treat your health condition. See the section, "How do I request an exception to PHP formulary?" on page v for information about how to request an exception.

What if my drug is not on the Formulary?

If your drug is not included in this formulary (list of covered drugs), you should first contact Pharmacy Customer Service and ask if your drug is covered.

If you learn that PHP does not cover your drug, you have two options:

- You can ask Pharmacy Customer Service for a list of similar drugs that are covered by PHP. When you receive the list, show it to your doctor and ask him or her to prescribe a similar drug that is covered by PHP.
- You can ask PHP to make an exception and cover your drug. See below for information about how to request an exception.

How do I request an exception to the PHP formulary?

You can ask PHP to make an exception to our coverage rules. There are several types of exceptions that you can ask us to make.

- You can ask us to cover a drug even if it is not on our formulary. If approved, this drug will be covered at a pre-determined cost-sharing level, and you would not be able to ask us to provide the drug at a lower cost-sharing level.
- You can ask us to waive a coverage restriction including prior authorization, step therapy, or a quantity limit on your drug. For example, for certain drugs, PHP

limits the amount of the drug that we will cover. If your drug has a quantity limit, you can ask us to waive the limit and cover a greater amount.

- You can ask us to cover a formulary drug at a lower cost-sharing level unless the drug is on the specialty tier. If approved, this would lower the amount you must pay for your drug.

Generally, PHP will only approve your request for an exception if the alternative drugs included on the plan's formulary, the lower cost-sharing drug, or applying the restriction would not be as effective for you and/or would cause you to have adverse effects

You or your prescriber should contact us to ask for a tiering or formulary exception, including an exception to a coverage restriction. **When you request an exception, your prescriber will need to explain the medical reasons why you need the exception.** Generally, we must make our decision within 72 hours of getting your prescriber's supporting statement. You can ask for an expedited (fast) decision if you believe, and we agree, that your health could be seriously harmed by waiting up to 72 hours for a decision. If we agree, or if your prescriber asks for a fast decision, we must give you a decision no later than 24 hours after we get your prescriber's supporting statement.

What can I do if my drug is not on the formulary or has a restriction?

As a new or continuing member in our plan you may be taking drugs that are not on our formulary. Or, you may be taking a drug that is on our formulary but has a coverage restriction, such as prior authorization. You should talk to your prescriber about requesting a coverage decision to show that you meet the criteria for approval, switching to an alternative drug that we cover, or requesting a formulary exception so that we will cover the drug you take. While you and your doctor determine the right course of action for you, we may cover your drug in certain cases during the first 90 days you are a member of our plan.

For each of your drugs that is not on our formulary or has a coverage restriction, we will cover a temporary 30-day supply. If your prescription is written for fewer days, we'll allow refills to provide up to a maximum 30-day supply of medication. If coverage is not approved, after your first 30-day supply, we will not pay for these drugs, even if you have been a member of the plan less than 90 days.

If you are a resident of a long-term care facility and you need a drug that is not on our formulary or if your ability to get your drugs is limited, but you are past the first 90 days

of membership in our plan, we will cover a 31-day emergency supply of that drug while you pursue a formulary exception.

If you are a current member of our plan, an unexpected transition could occur if you experience a level-of-care change. For example, if you are hospitalized and given a drug that is not on our formulary, once you are discharged from the hospital to your home, you will need to talk to your doctor about continuing the drug. If you and your doctor decide you should continue taking the drug, you will need to request a formulary exception for us to cover it. Our plan may provide you a temporary 30-day transition supply of the drug while you decide what action to take. Please contact us about the availability of a transition supply of medication when you experience a level-of-care change.

If you have questions about PHP, please contact us. Our contact information, along with the date we last updated the formulary, appears on the front and back cover pages.

If you have general questions about Medicare prescription drug coverage, please call Medicare at 1-800-MEDICARE (1-800-633-4227) 24 hours a day/7 days a week. TTY users should call 1-877-486-2048. Or, visit www.medicare.gov.

PHP's Formulary

The formulary below provides coverage information about the drugs covered by PHP. If you have trouble finding your drug in the list, turn to the Index that begins on page I-1.

The first column of the chart lists the drug name. Brand-name drugs are capitalized (e.g., KALETRA) and generic drugs are listed in lower-case italics (e.g., *hydrochlorothiazide*).

The information in the "Requirements/Limits" columns tells you if PHP has any special requirements for coverage of your drug.

The following abbreviations may be found within the body of this document.

Coverage Notes Abbreviations

Abbreviation	Description	Explanation
Utilization Management Restrictions		
AGE	Age Restriction	Some drugs on our formulary are not appropriate for and may pose a risk to people of certain ages. If a drug has an age restriction, the maximum age of appropriateness is noted. Drugs that have an age restriction require prior authorization.
PA	Prior Authorization Restriction	You (or your physician) are required to get prior authorization from PHP before you fill your prescription for this drug. Without prior approval, PHP may not cover this drug.
PA BvD	Prior Authorization Restriction for Part B vs Part D Determination	This drug may be eligible for payment under Medicare Part B or Part D. You (or your physician) are required to get prior authorization from PHP to determine that this drug is covered under Medicare Part D before you fill your prescription for this drug. Without prior approval, PHP may not cover this drug.

Abbreviation	Description	Explanation
PA-HRM	Prior Authorization Restriction for High-Risk Medication	This drug is considered a high-risk medication for seniors. If you are age 65 or older, you (or your physician) are required to get prior authorization from PHP before you fill your prescription for this drug.
PA NSO	Prior Authorization Restriction for New Starts Only	If you are a new member, you (or your physician) are required to get prior authorization from PHP before you fill your prescription for this drug. Without prior approval, PHP may not cover this drug.
QL	Quantity Limit Restriction	PHP limits the amount of this drug that is covered per prescription, or within a specific time frame.
ST	Step Therapy Restriction	Before PHP will provide coverage for this drug, you must first try another drug(s) to treat your medical condition. This drug may only be covered if the other drug(s) does not work for you.
Other Special Requirements for Coverage		
LA	Limited Access Drug	This prescription may be available only at certain pharmacies. For more information consult your Pharmacy Directory or call Pharmacy Customer Service at (888) 436-5018, 24 hours a day, seven days a week. TTY users should call 711.

Standard Retail Cost Sharing by Tier

Tier	One-Month Supply (30 Days)	Three-Month Supply (100 Days)
Tier 1 (Generic Drugs)	15% coinsurance	15% coinsurance
Tier 2 (Preferred Brand Drugs)	15% coinsurance	15% coinsurance
Tier 3 (Non-Preferred Brand Drugs)	25% coinsurance	25% coinsurance
Tier 4 (Speciality Drugs)	25% coinsurance	25% coinsurance
Tier 5 (Select Care Drugs)	You pay nothing	You pay nothing

You won't pay more than \$35 for a one-month supply, \$70 for up to a two-month supply, or \$105 for up to a three-month supply of each covered insulin product regardless of the cost-sharing tier, even if you haven't paid your deductible.

Our plan covers most Part D vaccines at no cost to you, even if you haven't paid your deductible. Call Pharmacy Customer Service for more information.
